Anglia Level Crossing Proposals

S25 – Cattishall (Great Barton Parish) Public Right of Way Reference – W-234/012/0

Network Rail has been working hard to better manage its level crossings and the risks they pose. It has developed proposals for the possible closure or change to public rights of way at around 130 level crossings in Anglia. Closing or modifying level crossings can help to bring about a number of benefits:

- Improve the safety of level crossing users
- Deliver a more efficient and reliable railway, which is vital in supporting the regional and UK economy
- Reduce the ongoing operating and maintenance cost of the railway
- Reduce delays to trains, pedestrians and other highway users
- Improve journey time reliability for railway, highway and other rights of way users

The level crossings in this initial phase of the Anglia Level Crossing Reduction Strategy do not include any new bridges or underpasses, and offer benefits which are currently affordable and deliverable.

Cattishall is one of the level crossings in the County of Suffolk. It is located in Great Barton Parish and has the postcode IP31 2QU. This is a stop, look and listen public footpath level crossing where the user has to decide whether it is safe to cross. The railway at this crossing carries passenger and freight trains with a line speed of 75 mph. There are generally 110 trains passing through this level crossing per day.

Network Rail's level crossing risk assessments are supported by use of the All Level Crossing Risk Model (ALCRM). This produces a score for the 'individual risk' presented as a letter ranging from A to M, where A is the highest risk and M is the lowest. In addition 'collective risk' is based on the number of people who use the crossing, and is presented as a number ranging from 1 to 13, where 1 is the highest risk and 13 is the lowest. Cattishall level crossing currently has an ALCRM score of C4 which is considered high risk. Key issues relate to large numbers of users, frequent trains, and sun glare. There were no incidents of misuse, 5 near misses and 3 accidents at this crossing between 2011 and 2015.

Public consultation was undertaken in June on initial options for changes at this level crossing. At this level crossing, Thirteen questionnaire responses were received. For Cattishall a summary of the questionnaire responses is shown below (route colours refer to the June 2016 Stage 1 consultation plan – please see the project website for details):

- 54% agreed with the proposals
- 23% of responses were neutral towards the proposals
- 23 % of responses disagreed with the proposals
- 31 % supported the red route
- 54% supported the blue route
- 15% of responses preferred another route

One respondent requested that the stage 1 consultation red route is modified to a more direct route along a path in a southerly direction south of the under bridge to Mount Road. One respondent commented that the use of the existing underpass would greatly improve safety with minimum adverse effects.

APPENDIX A

As part of the consultation process a wide range of statutory consultees, landowners and user groups were also consulted. The responses received have been taken into account when determining the preferred option.

During June and July of this year, Network Rail undertook new census surveys of the number and type of level crossing users. A three day census was undertaken (Saturday, Sunday and Monday) and the daily usage was as follows:

Weekday (Monday)	38 pedestrians
Weekend (average daily)	19 pedestrians

The consultation feedback together with a range of other factors such as user safety and convenience, environmental impacts and economic factors were used to determine a preferred option. In this case, an amended version of the blue route shown at the June 2016 Stage 1 consultation has been taken forward.

Our preferred option is to close the level crossing to all users. Crossing infrastructure would be removed and fencing installed to prevent trespass onto the railway. Users would be diverted on a new public track in farm fields on the north side of the railway which would provide a link to Mount Road via an existing railway underpass and the shared cycle/foot path. This would be suitable for use as a cycle trail.

Diversion lengths:

• If travelling from Green Lane to Cherry Trees on Mount Road the diversion will add an additional 300m to the route.

Photo 2: Alternative railway crossing - underpass

Photo locations are shown on the plan overleaf.

This summary sheet and a questionnaire are available at the public exhibitions and on the project website at: **www.networkrail.co.uk/anglialevelcrossings.** Please complete the separate questionnaire using the level crossing identification number **S25** and your feedback will be considered before the proposals are finalised ahead of submitting a Transport and Works Act Order to the Secretary of State.

To contact our team, please email us at: anglialevelcrossings@networkrail.co.uk or phone the helpline: 03457 11 41 41. We thank you for your time and providing your comments on the Anglia Level Crossing Proposals.
