

# Existing Site Plan

## CATEGORY AND DEFINITION

<b>Category U</b>	Trees unsuitable for retention Trees in such condition that they cannot realistically be retained as living trees in the current land use or longer than 10 years.
<b>Trees to be considered for retention</b>	
<b>Category A</b>	Trees of high quality with an estimated remaining life expectancy of at least 40 years.
<b>Category B</b>	Trees of moderate quality with an estimated remaining life expectancy of at least 20 years.
<b>Category C</b>	Trees of low quality with an estimated remaining life expectancy of at least 10 years, or young trees with a stem diameter below 150mm.

### NOTE:

Haydens Arboricultural Consultants were provided with a Topographical Survey but these do not always show the positions of all the trees/features on site. The locations of any additional features have been fixed using GPS. As such the position of the trees/landscape features should not be taken as exact but gives a fair distribution of their locations on site.
